# → Digital transformation, at scale and at speed

Who we are

We provide deep domain expertise and digital, cyber, and cloud-based platform services that are driving change across business sectors and government. We help government agencies figure out how to replace extensive legacy systems with cutting-edge platforms in a way that balances quick wins with a long-term strategy that includes mature governance. Our public health expertise also provides the foundation that public health clients need to accelerate COVID-19 recovery and set long-term solutions.

What we do—and how we do it differently

We have built a large and growing portfolio of solutions that drive digital transformation solutions through the adoption of next generation technologies for federal government agencies. Our innovative approach combines the best of advanced analytics, industry expertise, and enterprise technologies to build agile solutions that evolve to meet your changing needs.

Evolutionary architecture

Apply baseline frameworks and layer on appropriate technologies for your portfolio, while keeping up to date on delivery trends.

Agile engineering

Combine engineering methods, processes, and tools with rapid prototyping to empower scalable, efficient, and effective operations.

Scaled delivery

Provide patterns for enterprise delivery, including practices and tenets that are tailorable to each organization's specific needs.

Strategic consulting

Blend subject matter knowledge with tech expertise to create solutions that will thrive in any environment.

Advanced analytics

Pair data expertise with new technologies such as machine learning and AI to inform decision-making and drive mission effectiveness.

Leveraging technology to provide a better experience to professionals using the Child **Welfare Information Gateway (CWIG).**

Curating 6,000 resources on **ASPR TRACIE** to improve health professionals' emergency preparedness efforts.

Modernizing **BioSense,** the Centers for Disease Control and Prevention's cloud-based syndromic surveillance platform, to strengthen system resiliency and availability—including during COVID-19.

Providing technical and management services to transform **Food and Drug Administration's** digital services delivery.

Expertise

We leverage subject matter expertise and skills across a range of topics, including:

DevSecOps	Cybersecurity
Application modernization	ServiceNow bespoke applications
Enterprise integration	Advanced data and analytics
Cloud migration	Appian implementations
Hyperautomation	AWS managed services
Artificial intelligence	Adobe Experience Cloud

Our clients

We provide full lifecycle solutions using a broad range of technology platforms for public sectors and federal agencies, including the Department of Health and Human Services, the Department of State, the Department of Homeland Security, the General Services Administration, and others.

Our people

Our teams are most successful when we knit together our skills to simply solve problems. Diverse in every sense of the word, we get the right people in the room to offer new and different ways of thinking so we can offer the best solution—not the easiest.
