

New Jersey Superstorm Sandy Recovery

ICF helped New Jersey's Department of Community Affairs (DCA) implement the state's \$4.1 billion Superstorm Sandy Disaster Recovery Program:

- Provided subject matter expertise on CDBG-DR; The Stafford Act; FEMA programs; construction, housing, economic development, infrastructure, and environmental reviews; HUD Section 3 Program; the Davis Bacon Act; relocation; language access plans; and other cross-cutting federal requirements.
- Set up more than 130 staff to augment DCA staff at headquarters and nine housing Recovery Centers to help expand capacity quickly.
- Set up critical storm recovery departments such as finance, compliance, procurement, and communication with the ultimate goal of transferring knowledge and responsibility to DCA staff.
- Designed and conducted more than 150 distinct training sessions with a total of 3,100 attendees, including New Jersey state staff members and other stakeholders, in 18 months.

Maximizing CDBG-DR Funds for Community Rebuilding

Need

When Superstorm Sandy hit in October 2012, New Jersey's local and state governments were faced with the monumental task of responding to the immediate, critical needs of citizens while establishing a comprehensive, long-term recovery process.

In March 2013, the federal government allocated funding for Sandy recovery, but assigning these resources as quickly and effectively as possible required expert guidance in the management of Community Disaster Block Grant Disaster Recovery (CDBG-DR) funds. New Jersey needed to know how to:

- Best use the resources available to balance competing priorities with speed
- Stand up the functions and programs required for recovery
- Remain compliant with Federal regulations and reporting requirements

The cost of non-compliance would compound an already dire situation and add to the risk that the state would not be able to fund important recovery efforts for its communities.

Solution

While housing was a primary concern, more than 20 programs were ultimately established across all sectors to promote recovery, resumption of business, long-term sustainability, and improved resilience. ICF's 25 years of work with the U.S. Department of Housing and Urban Development (HUD) gave them the experience and expertise to help New Jersey staff navigate the CDBG-DR and Federal Emergency Management Agency (FEMA) requirements. After an initial advisory role, ICF's responsibilities were expanded to provide a full suite of end-to-end services.

About ICF

ICF (NASDAQ:ICFI) is a global consulting services company with over 5,000 specialized experts, but we are not your typical consultants. At ICF, business analysts and policy specialists work together with digital strategists, data scientists and creatives. We combine unmatched industry expertise with cutting-edge engagement capabilities to help organizations solve their most complex challenges. Since 1969, public and private sector clients have worked with ICF to navigate change and shape the future. Learn more at icf.com.

Results

Recovering and rebuilding strong communities following the unprecedented damage of Superstorm Sandy required expert policy knowledge and in-depth understanding of regulatory context. We ensured CDBG-DR funding was deployed where it was most needed and helped maximize the use of CDBG-DR funds for federal matching.

Beyond its role in helping manage through the crisis at hand, ICF's work was driven by the goal of transferring knowledge to state and local resources while building capacity for ongoing and subsequent disaster recovery work. With groundwork laid by proven experts, New Jersey state officials were well-positioned to reassure citizens and focus on rebuilding.
