About ICF

ICF is a global consulting and technology services provider focused on making big things possible for our clients. Since 1969, government and commercial clients have worked with ICF to overcome their toughest challenges on issues that matter profoundly to their success.

DRAGON stores qualitative and quantitative data from literature to help scientists implement principles of systematic review when developing assessments, including problem formulation, literature screening, risk of bias evaluation, and data integration.

DRAGON can help you:

- Manage tasks across a team
- Extract data for decision making
- Evaluate data quality and risk of bias
- Integrate evidence across data streams
- Visualize data in graphics and reports
