

Our comprehensive, end-to-end solutions help public health agencies, organizations, and foundations operate more transparently and continually demonstrate the value of their programs. We understand the complexities of public health operations, and we know how to pull all the pieces together to help our clients make smart decisions and maximize the value of their health efforts. We conduct health-focused surveys and help organizations meet public health surveillance requirements. We collect important data and use informatics to make them more manageable and meaningful. Our research and program supports help motivate behavior change and build organizations' capacity.

Our successful track record with diverse populations and complex issues is paired with unparalleled expertise and on-the-ground experience. Our time-tested and innovative research methodologies, local institutional review board, and successes with government clearance processes help our clients shorten the timeline between implementing programs and assessing achievement of ambitious health outcomes.

The public health environment is a complex one, and ICF's deep experience with government, private-sector, nonprofit, and academic organizations enables us to bring the best of each perspective to meet today's public health challenges.

Convenient, Flexible Access Through Key Contract Vehicles

ICF makes it easy to turn your goals into reality with multiple contract vehicles designed to fit a variety of needs. These vehicles offer alternatives for the solicitation and awards process, helping you get started faster. Our consultants offer the depth and breadth of experience needed to help you solve your most formidable challenges. Contact us to discuss how we can help you achieve more and make a lasting impact on the populations you serve.
